# CARVEN

#Stone\_gayaforesPorcelain

Perfección natural. No existen dos palabras que definan mejor la esencia de Carven, una colección de piedras que ha sido desarrollada a partir de una exquisita selección de material natural reproducida con precisión empleando técnicas digitales con efecto de relieve gofratto. La insistencia en convertir a la materia digital en la clave del producto cerámico ha permitido recrear sobre la superficie de Carven un característico efecto gofratto o, lo que es lo mismo, relieve por presión. Implementando la última tecnología digital, logramos aportar un plus estético a la pieza, donde las texturas se generan por la incidencia de la luz. La consecuencia es un diseño muy en sintonía con las actuales tendencias en decoración de interiores.

Carven es un porcelánico que incluye piezas base en tres formatos (32x62,5, 45x90 y 60x120/Rect.), con tres versiones grises de diferente intensidad, desde un leve perlado (Pearl) hasta un profundo negro antracita (Dark), pasando por un gris medio y neutro (Grey). La colección se completa con un decorado para los formatos 32x62,5 y 45x90, compuesto por multilistones, en el que se combinan las gráficas tratadas y con acabado gofratto con otras inalteradas, logrando un resultado tan singular como sosegado.

*Natural perfection. No two words better define the essence of Carven, a collection of stones that has been developed from an exquisite selection of natural material reproduced with precision using digital techniques with gofratto relief effect. The insistence on converting digital material into the key to the ceramic product has made it possible to recreate on Carven's surface a characteristic gofratto effect or, in other words, pressure relief. Implementing the latest digital technology, we manage to bring an aesthetic plus to the piece, where the textures are generated by the incidence of light. The consequence is a design very in tune with current trends in interior decoration.*

*Carven is a porcelain tile that includes base pieces in three formats (32x62.5, 45x90 and 60x120/Rect.), with three grey versions of different intensity, from a slight pearl to a deep anthracite black (Dark), passing through a medium and neutral grey (Grey). The collection is completed with a decoration for the 32x62.5 and 45x90 formats, made up of multilistons, in which the treated graphics with a gofratto finish are combined with other unaltered ones, achieving a result that is as singular as peaceful.*
